The Israeli Developmental Scale (THIS scale) for ages 0-5 years

Age (Years)	2							2	.5				3			3.5			4			4.5	4.5							6	
Milestone \ Age (Months)	24	25	26	27	28	29	30	31	32	33	34	35	36	38	40	42	44	46	48	50	52	54	56	58	60	62	64	66	68	70	72
Runs well without falling																													\Box	\Box	\Box
Climbs up and down the stairs without assistance																														\Box	\Box
Squeezes and sticks out lips to give a kiss																															
Has a vocabulary of over ten words																															
Recognizes familiar objects and pronounces them by name																															
Composes a sentence of at least two words																															
Participates in a dialogue																															
Understands actions and speech without gestures																															
Imitates horizontal, vertical and circle lines																															
Expresses freely	24																														
Jumps from a stair																															
Puts on shoes and dresses independently without buttoning																															
Imitates patterns (+) and copies circles																															
Stands up on one leg for 3 seconds																															
Counts three cubes																															
Familiar with at least three prepositions																															
Understandable speech													36																		
Plays with peer group																															
Dresses independently																															
Uses correct verbs and tense to describe a picture																															\Box
Answers orientation questions such as name or age																															
Jumps on one leg																															
Walks heel to toe																															
Draws a human figure																															
Copies geometrical shapes such as X and triangle																			48												

The Israeli developmental scale is based on over 3.5 million developmental examinations performed on approximately 650,000 children in Israel between the years 2014-2020,

 $by\ a\ research\ team\ of\ the\ Ministry\ of\ Health,\ the\ National\ Institute\ Timna,\ and\ the\ Research\ Institute\ KI.$

This scale is a part of an article published at JAMA Netw Open. 2022;5(3):e222184.

This scale does not replace the full guidance for developmental assessment in Tipat Halav to be published later. For more information and details, please contact Dr. Yair Sadaka at: yair.sadaka@moh.health.gov.il.
